Bosnia and Herzegovina
Bosnia and Herzegovina
Milestones achieved since start of the project

1. Increased number **PPCI procedures** from 15 to 41%

2. Increased number National of **PPCI centers** from 2 to 4

3. Introducing **24/7 mode** of working
Bosnia and Herzegovina
What were main challenges? And major successes?

1. Lack of well **trained stuff** in PCI units
2. Lack of **nights and weekend shifts** for PCI emergency teams
3. **Patient delays** in recognizing MI symptoms and **transport delay** do to the bad conditions

1. Almost triple increase of PPCI procedures
2. Introducing new hospitals in PPCI program
3. Decrease hospital mortality MI patients less than 5%
Bosnia and Herzegovina
Programs with less than 3 years: objectives for the next 3 years

1. 41% STEMI treated by PPCI
2. 340/mil STEMI pts treated by PPCI
3. Expanding program on more than 50% country
4. Education of patients to earlier come to PPCI centers
5. Partially developing of transportation network

(20)
Bosnia and Herzegovina

What is left to be completed for the objectives to be fully reached?

1. Expand program to whole country

2. Establish Regional PPCI network

3. Introduce STEMI/PCI registry
Bosnia and Herzegovina
Objectives for the next 3 years

1. Further developing **SSL structure**
2. Establish National **Fund** for MI treatment in Bosnia and Herzegovina
3. Fully developing of **Regional PPCI network**
4. **Public campaign**- raising awareness of MI symptoms
5. CME **education** for GPs and PCI stuff
Bosnia and Herzegovina
What are the next key activities for the next 6 months?

Reinforce activities to fully develop SFL structure in country
Bosnia and Herzegovina

Champion comments considered relevant:

Bosnia is specific, divided country, politically inefficient and economically undeveloped, still not supporting unique projects like SSL is.
