

Greece

Greece

Milestones achieved since start of the project

- 1. Registry
- 2. Networks
- 3. Public Campaign

Greece

What were main challenges? And major successes?

1. Difficulty in **gathering the data** in national level
 2. Difficulty in **creating networks, especially in regions with difficult topography**
 3. **Finding the funds** and support to go national
-
1. Most of the doctors were willing to cooperate
 2. Creation of 3 networks in big urban areas
 3. National appeal to the campaign. Reduction of patient delay time

Greece

Objectives for the next 3 years

1. Creation of networks in rural areas
2. Pre-hospital organization and triage
3. New Registry

Greece

What are the next key activities for the next 6 months?

Pre-hospital diagnosis and triage pilot program

New National ACS Registry

Greece

Champion comments considered relevant:

Due to the difficult topography of the country, the project is not completed yet. For example, we have to organize the STEMI care in the numerous small islands (pharmacoinvasive approach), we have to find the most suitable approach for the registry (permanent registry or fast track) and to organize the pre-hospital diagnosis and triage
