Portugal

Milestones achieved since start of the project

- 1. Portugal completed the **national PPCI network** in 2012;
- 2. Since 2013 **all centers are exporting the data to national registry**;
- 3. In 2015, we **exceeded 400 P-PCI/million/year**

Portugal

What were main challenges? And major successes?

1. P-PCI/million/year
2. EMS transmission of EKG and by pass secondary hospitals
3. Educational programs

Portugal

What is left to be completed for the objectives to be full reached?

1. Decrease Patient delay
2. Decrease System delay
3. Involvement of Health Ministry

Portugal

Objectives for the next 3 years

1. Increase P-PCI to 470/million/year, decrease premature mortality < 70 years and obtain a in-hospital mortality 7% with a total of deaths < 950 in 2020 (Portuguese Health Ministry objectives)
2. Maintain educational programs: STEMINEM, STEMICARE, StentNetWorkMeeting and the rehabilitation program (Rehab4Life);
3. Reduce System Delay: maintain the campaign Act Now Save a Life;
4. Start the OHCA program;
5. Merge the PSC Registries with official database mortality (SICO);

Portugal

What are the next key activities for the next 6 months?

Reorganization SSL program;

New project manager;

Stent for Life closing meeting;
